Minch Moor Petition

We the undersigned, are concerned that Minch Moor, near Innerleithen/Walkerburn, has been identified as a preferred area for a windfarm; that the plan is for approximately 14 x 100 metre high turbines most of which would be in direct sight of the village of Walkerburn and in close proximity to the Southern Upland Way; further we are concerned such a sensitive area has been so designated and request that the Scottish Parliament enquires into the issue of planning/environmental procedures for proposed windfarm developments and the impact on valued areas of internationally recognised recreational countryside.
